U.N. Staff Helps Victims of Earthquake

As soon as news of the earthquake which destroyed several towns in Ecuador reached United Nations Headquarters, members of U.N.'s international staff began a collection to help the victims of the disaster. Here, U.N. Secretary-General Trygve Lie, presents a check for \$3000 to Guy V. Partridge, of the American Red Cross, as part of the U.N.'s Secretariat aid to the stricken country.

CARBON CHURCHES WILL HOLD MEETING OCTOBER 18

The Anglican, Baptist and United Churches of Carbon are sponsoring a meeting of all Carbon people in the Scout hall on Tuesday evening, October 18, at 8 p.m., in the interests of the British and Foreign Bible Society. Rev. A.S. Wood, secretary of the Society for Southern Alberta, will show moving pictures and speak on the work of the Society. We respectfully request your attendance and interest.

GASOLINE TAX CUT ADVOCATED BY ALBERTA MOTOR ASSN

Moves to bring about a reduction of the nine cents a gallon gasoline tax and the cost of car license plates are to be taken up by the Alberta Motor Association at its next annual meeting to be held in Edmonton November 18 and 19.

The A.M.A. president, H. R. Chauncey, pointed out that in the period between 1932 and 1945, an estimated \$22,000,000 had been taken from motorists in this province in the excess of motor revenues over road expenditures. He said it was time the province started to give this money back and this could be done by lowering car license fees for instance. Alberta's car license fees are the highest of any province and strong demands should be made on government for a substantial reduction of not less than 25 per cent next March 31.

LONG BURIED CITY FOUND BENEATH DESERT SAND

CARBO—A fabulous ancient city buried under the sands of Arabia is said to have been found by "archaeologist" Wendell Phillips of Concord, California.

Mr. Phillips, who led a University of California expedition exploring the region for two years, said he found the remains of a great civilization near Mareb, traditional home of the Queen of Sheba.

Travelling from Aden, Arabia, on a Royal Air Force plane, he related, he landed on the site of ancient Timna, described by the Roman historian Pliney as the "city of 40 temples."

"Timna is covered by sand," he said. "However, several city walls, gates, and ruins of temples are still visible. In the centre of the city an obelisk emerges four feet above the sand. Nomads living nearby dug 15 feet deep without reaching its base. Hymartite inscriptions are carved on its four faces."

Mr. Phillips described the Hymartite as people living in the area 20 or 30 centuries ago. He described the area as an "archaeological treasure house" and one of the last explored regions in the world waiting for systematic research.

The Californian's air tour of unknown Arabia in a region where 3,000 years ago caravans transported spices to King Solomon.

A mountaineer, on his first visit to a city of any size, was fascinated by the asphalt streets. Scraping his foot on the hard surface, he remarked to his boy: "Well, I can't blame 'em for building a town here. The ground's so darn hard to plow, anyhow."

THE SMITH BROTHERS CROSS ATLANTIC

Two brothers, Colin and Stanley Smith, arrived in England recently after crossing the Atlantic in 42 days in their 20-foot Bermuda-rigged yacht. Twenty-nine-year-old Colin and thirty-year-old Stanley are the sons of the coxswain of the Yarmouth, Isle of Wight, lifeboat. They spent their demobilization

Village Council Holds Meeting

The regular monthly meeting of the Village of Carbon was held in the village office Monday evening, October 2, Mayor Ernest Fox, Deputy-Mayor J.J. Forsch and Councillor H.J. Gimbel were present.

A number of ratepayers attended the meeting and a suggestion was made that a "special frontage tax" be made on lands abutting that portion of streets where sidewalks are constructed. Council promised to give the matter due consideration.

Council suggested that a consultation be held with the local R.C. N.P. constable and the representative of the Highway Traffic Board with a view to having proper traffic signs erected in the village.

Deputy-Mayor Forsch agreed to attend to the matter of a coal heater for the fire hall.

First, second and third readings were given to By-law No. 195 and unanimously adopted. This By-law deals with grants to benevolent organizations.

Permission was granted to Fred Schuler for a license to operate a confectionery store. Accounts and pay sheets completed the business of the meeting.

CANADA'S POPULATION

Canada's population is now estimated at 13,555,000, an increase of 662,000 from the preceding year, according to the Dominion Bureau of statistics latest figures. The addition of Newfoundland as Canada's tenth province brought 348,000 new citizens. The natural increase as a result of more births than deaths during the year ending June 1st accounted for an increase of 225,000. Nearly 125,000 immigrants entered in the last year, although this was somewhat offset by the emigration of more than 30,000 persons.

Estimated populations by provinces as at June 1, 1949, stand as follows:

Ontario 4,411,000; Quebec 3,887,000; British Columbia 1,114,000; Alberta 871,000; Saskatchewan 861,000; Manitoba 778,000; Nova Scotia 445,000; New Brunswick 516,000; Newfoundland 348,000; Prince Edward Island 90,000; Northwest Territories 16,000; Yukon 8,000.

BRITISH COATS FOR AMERICAN TROOPS

A Manchester, England, firm has secured a \$1,000,000 order from the U.S. Government to supply the American soldiers all over the world with a civilian type of rain coats. This is the result of a three year effort by the firm to establish a good footing in the U.S.A. market. The firm's organization is already supplying rainwear to the American public at similar prices to garments produced in the U.S.A.

SHIPMENT OF TRACTORS TO CANADA

The first shipment of Fordson Major Tractors valued at more than half a million dollars has been shipped from the United Kingdom to Canada. This was announced on Sept. 20 by Lord Aldeade, Chairman of the Ford Motor Co. He added that the company hoped this initial order would be the forerunner of many more.

EDITOR AND FAMILY MOVE TO CARBON

Mr. and Mrs. Wilf Skerry and family of Didsbury Monday took up residence in the home formerly occupied by Mrs. H. Skerry. Mr. Skerry, who is publisher of the Carbon Chronicle, will commute between Didsbury and Carbon for the next couple of weeks while the machinery in the Carbon office is being put into working order.

All news and advertisements which are to appear in the Carbon Chronicle may now be handed in to the local office except on Wednesday, when the editor will be in Didsbury. On that day they may be left at his home, three doors north of the phone office. All news items and stories handed in will be greatly appreciated.

During the 1948-49 crop year Canada exported wheat flour to 85 different countries or territories.

193 Million Bushel Crop in Alberta

The final crop report issued by the Alberta Wheat Pool indicates total grain production in Alberta this season of 183,635,000 bushels, as compared with 257,950,000 bushels in 1948.

Average wheat production is estimated by the Wheat Pool at 127 bushels to the acre this season, as compared with 184 last year and the long term average of 18 bushels. The quality of the wheat crop will be lower than last year, the percentage of 1 Northern will be about one-third less. Practically all the 1 Northern will come from Southern Alberta. The quality of oats and barley is also lower and most of the better grades of these grains will come from districts north of Edmonton.

TESTING SOIL WITH SPECIAL CROP—The fertile muck soil areas south of Montreal are now being tested with a special crop. A large firm dealing in perfumes and essential oils has planted out 35 acres of mint near Ste. Clothilde de Chateauguay to determine the suitability of the soil for producing the peppermint oil-bearing plant. The Ste. Clothilde and surrounding district is known to contain thousands of acres of some of the best muck soils on the continent. The crop will remain in the ground three years before re-planting will be necessary. Summer cultivation consists of rigid control of weeds so most plants other than mint bear substances which cannot be tolerated in pure mint oil. In this first year the crop was allowed to grow until fall before cutting, however, in the two succeeding years it is expected that the plants will have developed sufficiently to provide more than one cutting. The above photos show, left, the boiler shed and condenser which are part of the equipment that will extract mint oil and cedar oil, and right, young mint plants planted in rows four feet apart last May which have just about filled in all the space between the rows. Foreman R. Duhaime is seen in the picture.

CHAMPIONS at the Cowichan Agricultural Exhibitions on Vancouver Island were, above, left: Mayfield, Its Sylvia, owned by Miss M. Wadden, Duncan; right: champion Holstein bull was Paulholm Netherland Perfection owned by Riverside Farm, Cowichan Station. Above, left: Kewfarm Hilda Hengerveld, grand champion Holstein cow, owned by L. H. Margitt, Duncan; right: champion Ayrshire cow was Doreen of Sonenos, Duncan, B.C.

BURIED ALIVE — Billy Turchin, 11, of Coburn, recently had the misfortune to have nearly a ton of earth, planks and debris fall on him when playing in an underground play dug-out.

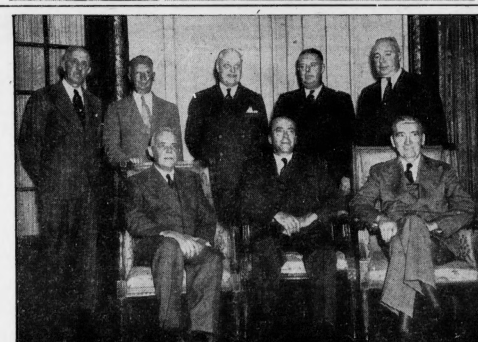

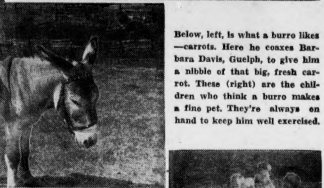

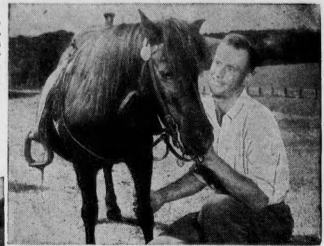

UNUSUAL COB OF CORN—This most unusual cob of corn was picked in a good field of silage corn grown on the farm of O. Vincent, near Longueuil, just across the river from Montreal. Growing on a single stock the central cob was a small perfectly formed cob but it was surrounded by 17 other smaller and thinner cobs. The kernels were well grown and matured.

HAD A BIG DAY — Roger Shantz is his dad's "lired man" as the Plattville horse show winds through a long afternoon, with Dad winning so many prizes with his horses it gets monotonous for a young fellow. Roger's dad is Nils Shantz of Plattville, Ontario, and horses, especially Clydes, are his hobby.

A Burro's Fine Until He Snoozes

Mr. Don Hindley of Everton, Ont. owns a Mexican burro. Here Mr. Hindley is shown with "Della," the Shetland pony who is over 20 years old and popular with children. And this (centre) is the way you ride a burro. Mounting isn't so hard, but when he stops for a nap, you might just as well settle down to wait, as these exasperated youngsters learn:

FISHERIES COUNCIL MEET—Men who guided the destiny of the Fisheries Council of Canada since its beginning five years ago were present at the historic meeting of the Council in Ottawa recently when Prime Minister Louis St. Laurent addressed the assembly. Left to right, seated, the Prime Minister; F. Homer Zwickler, Lunenburg, N.S., present president of the Council; Fisheries Minister R. W. Mayhew; standing, Captain F. W. Wallace, Gardenvale, P.Q., honorary president; C. J. Morrow, Lunenburg, 1945 president; F. S. Eckman, Vancouver, 1946 president; W. S. Lee, Halifax, 1947 president; J. M. Buchanan, Vancouver, 1948 president.

The Adventures of Captain Morgan

EPISODE THREE

AFTER THREE DAYS OF REST AND FOOD AT THE CAMD OF THE BOUCAN HUNTERS, MORGAN AND HIS COMPANIONS HAVE RECOVERED MUCH OF THEIR STRENGTH.

TO BE CONTINUED

Lecturing Youngsters

"Mountie" Has Taken The Role Of Teacher Besides Policing

OTTAWA.—The Mountie has turned school teacher. When the Mountie isn't chasing "bad men" over the frozen wastelands of the north, he's lecturing to youngsters, telling them how to become good citizens. The teaching role is voluntary and comparatively new.

Started four years ago on the prairies, lectures have become a popular item in most classrooms across Canada. Mounties already have delivered about 37,000 talks to more than 1,500,000 children. They're still at it, too.

No wonder the kids like the lectures. The talks range around such exciting topics as the story of the R.C.M.P. dog patrols in the Arctic and how discipline, courtesy and respect by the law make fine citizens.

The mountie stresses the role of the policeman in the community and the need for his kind of public service. He tries to show how a policeman protects the young, that he is not always trying to spoil someone's fun—unless that person is making it tough for others.

School marma agree that the talks

To Reclaim Paint Brush

A valved paint brush is never as efficient as a new one. Old brushes are money savers and usually a neglected part of many household paint jobs.

Soak it in turpentine or liquid brush cleaner for a day or two, occasionally working the bristles in the loosened paint. Use a scraper to remove old paint, and then scrub the brush for several hours in hot, soapy water.

Sprinkle soap powder on a washboard and rub the brush across it, using the same motion as in washing. First rub the brush with the soap tip the bristles. When they are loose, place the brush flat on the board and press it firmly with the soap hand as it is rubbed on the board with the other.

Dip the brush in hot water, reverse it and continue rubbing with additional soap. If bristles remain stiff, try and with the soap. Finally, rinse the brush in cold water until all traces of soap and paint have been removed from the bristles and the rinse water remains clear. Comb the bristles and dry.

UNITED STATES SENATE

HONORS SISTER KENNY

WASHINGTON.—Senator Elizabeth Kenny, Australian nurse noted for her work with infantile paralysis, has been "honored" by the United States Senate.

It went to the house of representatives a resolution to allow her to come into the United States any time without observing normal immigration procedures.

UNIQUE INVENTION
A weather station has been invented to operate for weeks or months in places where human observation cannot survive.

On The Side

—By—
E. V. Durling

HOMES AND WOMEN

The first feminine bathing suit was in North America that rated the term "country" was the so-called "Pacific Coast bathing suit." When Annette Kellerman appeared on Beverly Beach, Mass., wearing one of these suits she was arrested. That was about 1910. The scantiest of today's bathing suits is the one that originated on the French Riviera a couple of years ago. Four of these suits could be carried in a woman's handbag. Few women appear attractive in this suit. The fact is, even most beautiful women have more appeal in clothes than wearing scanty beach attire. The average feminine form is just not adapted to the modern bathing suit.

Was just talking to a fellow who was an "incubator baby." He weighed at two-and-a-half pounds at birth. Now he is six feet, two inches tall and weighs 160 pounds. He's a real brawny fellow. Football player at college. Many incubator babies reach a similar state of health. But they are rarely, if ever, plenty strong. I was told that a baby was born safely. In London recently a baby was born 14 weeks too early. It weighed two pounds, two ounces. Four nurses cared for this tiny infant day and night. It was in the incubator 10 weeks. When it reached the size of 17 weeks it was returned to its mother in healthy condition weighing 13 pounds.

GETTING IT RIGHT

When a red-haired mother enters a beauty salon her children are ever red-haired. That's what I noted a man of science claimed. I immediately checked on it. The old boy is far off the beam. I have learned of a number of combinations of red-haired husbands and red-haired wives who have red-haired children. An outstanding example is a Roxbury, Mass., couple. The husband has deep red hair and the wife's hair is jet black. They have nine children, five of whom are red-headed!

PAPE FIRST

When your children begin to talk did you say "papa" before saying "mama"? A young mother of Boston expressed herself as much depressed because her first born said "papa" before "mama" than she did when in distress she calls out "papa" instead of "mama"!

PLEASE NOTE

For the film rights of the novel, "Gone With the Wind," Margaret Mitchell received only \$50,000. The picture, "Gone With the Wind," has grossed over \$25,000,000 and is still earning money. If Miss Mitchell had a royalty contract, even for a small percentage of the box office, she would have eventually received about \$25,000,000 for her effort!

LARGE AUTO

How long was the longest automobile you ever saw? The longest I have seen are some cars used for funeral service by a Manhattan undertaking firm. The longest and largest car in the automobile history is one made to order for the late King of Siam. This automobile is 23 feet long and weighs 8,000 pounds. It is bullet-proof. It gets only one mile to a gallon of gas.

Styles That Have That Individual Look

The mainstay blue serge suit, (left), is brightened with touches of sulphur colored fabric on cuffs and collar. The navy baret is trimmed in scarlet and sulphur. From Paris comes the creation, (right), featuring huge patch pockets, a white dickey and black buttons in a simple black and white. It is equally chic for town or forest wear.—Central Press Canadian.

(By Francis James)
Dear Miss James:
I am enclosing a sketch of my 14-year-old daughter's bedroom. We are going to redecorate, and the room is only 9 by 11, our chief aim is to make it look larger. The present furniture consists of a single bed with a low head and no foot board, a kidney-shaped dressing table and stool, a low boudoir chair, a bookcase, a small painted desk and a small high-backed bedstead.

At present the colour scheme is rose and cream, but my daughter feels that she would like something a little more sophisticated. We would appreciate any suggestions you might have as to wallpaper, slip covers, bedspread, floor covering and furniture arrangements for this room. Sincerely,
Mrs. J. E. J.

Dear Mrs. J. E. J.:
I am enclosing a sketch showing suggested furniture arrangement for your daughter's small bedroom. I will notice that I suggest the whole thing to "on the bias." This, I think, is about the only way you can provide yourself with extra floor space, thus making the room appear larger. The logical place for the bed is at the corner above the bed. The dressing table could then be placed, also at the corner, between the window to the left of the bed and the door leading into the hall. The desk could be placed in front of the window to the right of the bed, and the boudoir chair slightly forward and to the right of the desk. The bedside table could be placed before the window to the left of the bed. I would suggest that you dispose of the bookcase. Too much furniture in a room of this size is bound to give a cluttered appearance. To replace this you could build two or three shelves across the corner above the bed. As to floor covering—since your furniture is arranged diagonally, a conservatively dark linoleum with a diagonal design in line with your furniture would be appropriate.

Light wallpaper would be in order for a room of this size. Lime green, either solid or with a small design in a darker green would be a good choice. Accessories in grey should give the right touch of sophistication for a young girl.

Window draperies, for example, could be in either haphazard block tones or chintz with a pale grey background and pattern in a deeper smoky grey. This could then be repeated in a bedspread and the alpine or the mountain scene. The light table skirt and bedspread proper could be in line green.

Pat men, says a sociologist, are more easily persuaded to wash dishes. Then, again, it may be that fat men did the more difficult to hide behind the living-room sofa after dinner.

South African archeologists have found eggs and eggs. Now a new question rises: Scrambled or sunny side up?

If they find any left-over toast it probably will have the world's toughest crust.

In the good days of the ole swimmin' hole would have lost a lot of ter charms if folk had known as much about bacteria as they now do.

A new vitamin—nicotin—has been discovered. Golly, how did we ever manage to get along without it before?

Husband got a divorce because his wife, he charged, drank him blue. Wonder if the judge gave him any copy of the lecture?

A news item told of a sale that totalled "roughly 10,000,000." Ten million—that's not rough, that's downright mean.

A customer entered a store, tried on a pair of shoes, held up the place and escaped with \$105. Story didn't say but well bet those were sprinter's shoes.

Britain To Obtain Pair Of Snow Geese

LONDON.—Britain will obtain two of the rarest species of wild fowl in the world, Snow Geese, from the Canadian north west, Peter Scott, artist-ornithologist and director of the Severn Wild Fowl Trust, announced.

Scott, who captured the pair of geese himself, said they would be housed with care, and efforts would be made to breed them to save the species from extinction.

Chinese drama dates from A.D. 720.

To Peel Right — Eat Right

: STAMP CORNER :

By JAMES MONTAGNES

Many stamps have been issued to the North Pole, through the Mediterranean area, even around the world. On all these trips mail with spectacular stamps has been carried. The list of countries which printed special stamps in connection with these expeditions includes Finland, Greece, Hungary, Iceland, Italy and its three African colonies, Liechtenstein, Lithuania, Russia and San Marino. That makes the Graf Zepplin the best postally remembered method of transportation.

New issues. . . Brunel, small British postage in the Borneo area, is issuing a set to mark the 25th anniversary of the reign of its sultan. . . Peru is to issue a long set for the sixth Pan-American Postal Congress to be held at Lima. . . A number of additional countries have announced special stamps for the 75th anniversary of the Universal Postal Union. Finland is to issue a stamp, Luxembourg is to issue a special stamp, and the Netherlands is to issue a stamp in coil and booklet perforations. Haiti will issue a set featuring its current president and its president in 1874. Denmark will issue one stamp with a globe. . . The Weimar German Republic has issued a set marking its formation in September when the ship reached Argentina.

The Graf Zepplin was built in 1927 and 1928, and made its first flights in 1929. The year that Germany overcame a long period of its first crossing to the United States. Two years later on the airship's first recent United States stamps. The stamps for the ship reached Argentina, Brazil and Paraguay. . . Then the airship crossed the United States, and three stamps were issued by the country to mark the airship.

These three U.S. airmail stamps have turned out the best investment in recent United States stamps. The three stamps were available only for the one flight. They were sold in 100 cities for two months. The stamps have a face value of 60 cents, 1.50 and 2.50. Today these stamps are worth close to 40 times their face value!

The Graf Zepplin airship made many trips throughout Europe, to

Honest Man Does Forgery As Business

NEW YORK.—With the aid of a pocketful of fragrant cigars and a battered old fountain pen, John Braungard forges signatures.

He also predicts earthquakes, explores terrestrial magnetism and publishes a stock-market tip sheet. But these are his hobbies.

The 74-year-old "honest forger" signs other people's signatures as a business.

Happily for the cause of law and order, Braungard does all his forgeries for a firm which specializes in putting out letters printed and signed to appear as personal correspondence. Orders may run from several hundred letters to as many as 500,000. Each one appears to have been typed by a stenographer and signed personally by the boss.

Braungard studies each signature under a magnifying glass. Then, putting himself in what he terms a "photographic trance" he surrounds himself with a thick haze of cigar smoke, he takes the signature over and over again without missing a single detail.

"When I am busy writing a man's signature I seem to be carried along by a psychic drift," Braungard says. "I have no experience whatsoever of his character."

"Personally does not shine through as clearly in women's signatures. They are easier to forge because they have fewer peculiarities." Braungard buys his pens in pawn shops, battered old relics with blunt tips. He has been known to make a giving character to a forged signature. He says the new ball-point pen is "damned good."

The legal forger says his banker has never suspected his rare gift, and he wants to keep it that way. "The finest signature I ever saw by a fellow was John Hancock's," says John J. Hancock was the name.

John J. Adams, C. Johnson, Toronto.

Ed. Note.—If you have any old Canadian stamps for sale or exchange, write to our Advertising Director, W. H. Toronto, Ont., who is an expert collector. He will send the self-addressed stamped envelope for reply.

Roll Perfect TAILOR-MADE CIGARETTES

ON ALASKA HIGHWAY

Road conditions on the Alaska
highway are good, enabling cars
to make good time without diffi-
culty, according to the motor tour-
ists from the U.S.
Recently, three young university
students from Oklahoma drove
from Fairbanks to Edmonton, 2,192
miles in the record time of 59
hours. They drove a 1947 model
car.

The trio said they had only one
stop. That was at High Prairie
where they were held up for four
hours waiting for a gas station to
open.

The students, John A. McGee, 20,
Frank Giesentanner, 22, and Leo
C. Anderson, 23, went north last
June over the highway to take
summer employment in Alaska.

Their jobs included gold mining
and dredging. They found that
while there was some unemployment,
the country was "booming".
Many U.S. university students were
employed there during the sum-
mer.

The trio from Fairbanks was
made without encountering any
trouble.

Miss Jolayne Milligan, Miss
Marilyn Hay, Miss Anna Carlson,
Mr. Dale Poxon and Mr. Bob Gar-
rett spent the holiday week end
visiting in Carbon at their respec-
tive homes.

Born in the Cadomin hospital to
Mr. and Mrs. Kenneth Wheat on
Sunday, October 9, a son.

Company staff at Trochu has been
transferred to the Vermilion yard
and took up his new duties a week
ago Tuesday.

Len Poxon, Jim Flaws and Fran-
cis Poxon of Carbon, and Ed Rou-
beau of Didsbury returned Thurs-
day from a goose hunt in the Aca-
dia Valley district with a bag of
eight geese.

Mr. and Mrs. Frank Emyra of
Acme attended the A.T.P.A. meet-
ing in Carbon Tuesday evening.

—The Gamble Ladies' Aid will
sponsor a Bazaar and Tea in the
Scout Hall on Saturday, November
5, from 3 to 6 p.m.

—Is your subscription in arrears?
Check the label on your paper
which shows the date to which
your paper is paid. Prompt pay-
ment of arrears would be appre-
ciated.

About 100 men took part in a
coyote hunt held in the district on
Sunday, October 9. Not a single
coyote was caught but one red fox
succumbed to the hunters after a
long, hectic chase.

Proceeds from the masquerade
dance being sponsored by the Car-
bon Lions Club on October 26, will
be used for a Halloween party for
the children of town and district.
Harold Anderson and His Ranch
Boys will supply the music. Be
sure to attend!

Mrs. S.J. Garrett is home again
following her recent illness and is
on the road to recovery.

Miss Neva White spent a couple
of days at her home over the
Thanksgiving Day holiday.

A rummage sale will be held in
the basement of the Anglican
Church on Saturday, October 22,
from 3 to 6 p.m. All articles donat-
ed will be gratefully accepted. If
anyone wishes articles to be pick-
ed up please phone Mrs. J.A. Barr
at her residence above the Bank of
Montreal and a car will call.

Mrs. W. Poole has returned to
her home at Carbon following an
extended visit at the Pacific coast.

FIRE PREVENTION WEEK IN ALBERTA

The week of October 9th to October 15th has been
officially proclaimed Fire Prevention Week. Its obser-
vance throughout Canada and the United States is to
mark the beginning of an entire year of intensive fire-
safety work.

Fire Prevention Week serves to focus public atten-
tion upon our disgraceful loss of life and the awful
destruction of property by fire. Its purpose is to give
the public a chance to take an active part in the vital
work of reducing loss, thus forming safety habits which
it is hoped will be carried through the entire year.

To members of the local fire brigades Fire Pre-
vention Week will, among other things, provide an oppor-
tunity to demonstrate their skill in protecting life and
property. To all others it should mean the opportunity
for inspecting their homes and places of business and
removing or correcting all those conditions which may
possibly cause a fire.

The responsibility for the success of Fire Pre-
vention Week rests not only upon members of the local fire
brigades, but upon each and every one of us. And to be
a real success we must discharge our responsibility
every week of the year.

During the ten year period ending December 31,
1948, there were 19,228 serious fires in the Province of
Alberta. These fires caused a loss which reached the
staggering total of \$19,927,648. In those ten years 315
men, women and children died in Alberta as a result
of fire.

This appalling situation is not improving, for in
1948 alone there were 2,285 fires which caused a prop-
erty loss of over three and three-quarter millions of
dollars, and brought death to 49 men, women and
children, all in the Province of Alberta.

These figures should spur us on to make an all-
out effort to reduce fire losses through proper care in
handling fire. An analysis of the causes of fires and
resulting loss of life over the past twenty months re-
veals that lighting stoves with gasoline or kerosene
lead all the rest. This was followed by suffocation,
people trapped in burning buildings; by children play-
ing with matches; by the practice of leaving children
alone in the home.

Every parent, every adult and child in Alberta is
urged to be careful with fires. Correct any condition
which might cause fire. Most fires are preventable.
To think and act Fire Prevention. Make Fire Prevention
Week the beginning of a whole year in which your
home, your place of business, your life and the lives
of those you love are safe from awful destruction of
fire.

Provincial Secretary

E. R. HUGHES,
Fire Commissioner

Portrait in your bank book

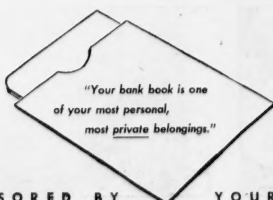

YOUR BANK BOOK is a little book . . . yet in it you
can just about trace the outlines of your life story.

It pictures at a glance how much you've spent,
how much you have left.

It's one of your most personal, most *private*
belongings. It gives you a full accounting, figured to the
penny by your bank's trained staff. Clear as a bell!

Your bank book is a limited edition — one copy only.
What is in it is known only to your bank and to you.

Multiply your bank book by seven million and
you get some idea of the book-keeping job your
Canadian chartered banks are doing. There are more
than seven million deposit accounts like yours . . .
